## Venice at Night

Is even more *interesting*  
than Venice by DAY 50

### GADGET on the GO

Except for losing your cell phone, nothing is worse than a dead battery. But with a **Turbo Charge** portable cell phone charger (\$24.95, [www.turboCELLcharge.com](http://www.turboCELLcharge.com)), battery death will never again cause you to miss taking or making an important call. Powered by only one AA battery and small enough to fit in a jacket pocket or tiny clutch bag, the lightweight charger is equipped with multiple adapters to fit any cell phone. No need to be techno-savvy. Just plug it in, and within moments its blue light illuminates, letting you know that your mobile is charged and, just like you, ready to go.—L.S.
